

By a nationwide anti-Trump and anti-US uprising, we will bring forward the new world where US troops will be withdrawn and independent reunification and democracy will be realized.

The US president Trump smashed the second summit between North Korea and the US. At the press conference on February 28th, Trump strongly emphasized, "Dismantling the Yongbyon complex wasn't enough to do what we were doing." and the US Secretary of State Pompeo strongly explained, "We couldn't get to listing nuclear weapons and other complicated elements". On the other hand, As Foreign Minister Ri Yong Ho stated "In detail, there are 11 UN sanction resolutions all together imposed upon the DPRK, and we proposed the United States to lift the articles of sanctions that hampered the civilian economy and the livelihood of our people from 5 UN sanction resolutions adopted in 2016 and 2017", he revealed the Trump's lies.

Trump broke down the summit on purpose by letting Bolton participate in expanded meeting and by requiring to dismantle the Yongbyon complex and more of it and finally by attempting to enforce "Libya model" for denuclearizing North Korea. As if he was mocking the common expression that there hasn't been a failed summit in history, Trump has shown total disrespect towards the spirit of at least minimal diplomatic faith, when just the final signatures remained to be placed on already agreed deal. It is the extremely dangerous and reckless-behaviour that pushes North Korea to having no other choice but to choose a "new way" mentioned in New Year's address.

Obviously "Libya model" for denuclearizing North Korea is nearly a declaration of war that would ravage the Korean Peninsula and annihilate our people. Libya, which did "Denuclearization first" in 2003 as the US insisted, was devastated after 8 years and the leader Gaddafi was found dead, murdered brutally. That is the only reason why Trump's current remarks aiming at enforcing "Libya model" on North Korea overlap with his reckless remarks from September 2017 about "totally destroying North Korea". The world has already fully witnessed who contributed to peace and stability in the world and who caused war and division over the past period.

We are assured that the truth that imperialists never withdraw by themselves is confirmed yet again. Our nation proclaimed decisively, on the Korean Peninsula and abroad, that we determine our destiny on our own accord through April 27th Panmunjom declaration and September Pyongyang joint declaration. No matter how

much Trump government continues with any sanctions and reckless behaviour, the general trend of peace, prosperity and reunification of the Korean peninsula will never be changed. Our people will force to withdraw US Troops by a nationwide anti-Trump and anti-US uprising and will bring forward a new world where independent reunification and democracy are realized.
